

# COVID Risk Monitor Solution

Enabling schools across South Africa to protect their staff, educators and learners post lockdown

**Monitor COVID** is a comprehensive platform for managing and reducing the risk of transmission of COVID-19 across schools in South Africa. It is fully compliant with the post lockdown COVID-19 regulatory reporting and screening requirements.

Our solution monitors the health of all the staff, educators and learners visiting the school premises. This ensures that all persons declare that they are fit for work/school and are not a risk for the transmission of COVID-19 at the school premises.

We provide you with a platform that includes the following 3 independent modules:

1. Integrated software platform for the proactive reporting of COVID-19
2. Screening services with the placement of nurses and healthcare providers
3. Procurement of PPE, disinfectants, and consumables

**Monitor COVID** empowers schools to be able to:

- Keep their staff, educators, learners and visitors safe
- Identify high risk persons entering the premises
- Health screening and isolation prior to access
- Turn away high-risk individuals proactively
- Follow Health & Safety protocols
- Distribute Health & Safety directives and education
- Continue with school operations
- Limit COVID-19 anxiety amongst their staff, educators, learners and parents

The Monitor COVID software solution is an integrated web-based data management and reporting solution that helps the schools in South Africa to manage all COVID-19 information capturing requirements.

The system has the following features:

- ✓ **Self-Screening:** Staff, educators and learners can perform daily pre-screenings to confirm whether they will be allowed access to the school premises. The information captured on the self-screening is used to prepopulate the staff/ learner member's information when they go through the Access Control processes at the office building.
- ✓ **Onsite Screening & Access Control:** All persons entering the school premises are required to complete a screening and capture their temperature readings to declare that they do not pose any symptoms and are no risk to your staff and learners. We will provide fully trained Risk Assessment Staff who will conduct this process.
- ✓ **School Audits:** Your Risk Officer can confirm that the necessary protocols and mitigation measures were in place to minimise the risk of the staff, educators and learners. You can report on this weekly.
- ✓ **Order Products:** Schools can place orders for the procurement of Personal Protective Equipment (PPE), disinfectants and other consumables while keeping record of all orders placed.
- ✓ **Education:** Staff, educators and learners can view the latest educational health, hygiene and safety videos to ensure that they are aware of the risks related to COVID-19. The system allows for a declaration to confirm that the staff member or learner has consumed the educational content and declare that they will implement the content into their lives.
- ✓ **Document Library:** Schools can keep records of all their important and relevant documents and templates. This will ensure that the documentation is in one place and continuously updated.
- ✓ **Useful Links:** Schools can share useful links to educate their staff, educators and learners on COVID-19 as well as any other useful links that are relevant to the school.
- ✓ **Temperature Recordings:** Temperature readings are captured upon entry into the office building. Schools can continue to capture temperature readings throughout the day to ensure that high risk individuals are proactively identified and isolated where required. The current regulations require that temperature readings get captured every four hours.

## COVID Risk Monitor Solution

*Monitor COVID platform is easy to use application and requires only access to the internet. It can be operated on all IOS and Android devices including mobile, tablets, laptops, and desktop computers.*

### EASY TO USE

#### For schools

Sign up with us for 6 or 12 months

Download the link to PC, Tablet or Phone

Register and complete your details

Set-up the rules for entry to your school premises

Send the link to permitted entrants

Monitor the status of entrants/occupation

Send the status report to DOL and authorities

#### For staff, educators, learners & visitors

Download the link to PC, Tablet or Phone

Register and complete your details

Complete self-assessment before leaving home

Get your status and adhere to the advice

Have your temperature captured at entry booth

Update your status at the required intervals
