

# Invitation to 2017 ICT budget planning breakfast session

## Let us assist in making your ICT budget work for your school

Think Ahead can assist your school with your 2017 ICT integration objectives and budget planning to meet these objectives. Juggling an ICT budget is challenging at the best of times. Not only is technology fast-moving and constantly evolving, but current economic pressures add to the challenges.

Therefore versatility, value for money and sustainability are increasingly important when it comes to ICT planning and purchasing.

Have you addressed costs for: IT support, teacher training, consumables, network, software and hardware?

## Join us at a breakfast session, where we will discuss the following:

- Audit current **infrastructure and assets**
- **Identification of staff** ICT skills and required training
- **Lab, student and teacher** device purchase and installation options
- **Digital text books** for iPad
- **iPad upgrades**
- Flexible 6, 12 and 24 month rental **and finance options for iPad and accessories**
- **Strategic recommendation and costing proposal for ICT infrastructure** (connectivity, workflow, security and device management)
