

**KINGSMEAD
COLLEGE**

Dr Kathie Nunley connects
current psychological and
neurological
**RESEARCH to the
CLASSROOM**

Kathie F Nunley delights teachers (and parents) around the world with her practical and information-packed talks on brain development and her humorous insights into how students learn. She offers inspirational solutions to the challenges of today's fast-paced, media-enriched and diverse classrooms.

She is an educational psychologist, researcher and best-selling author of several books on the brain and teaching in mixed-ability classrooms, including *A Student's Brain* (Brains.org) and the best-selling, *"Differentiating the High School Classroom"* (Corwin Press).

Dr Nunley is the developer of the Layered Curriculum® method of instruction and has worked with parents, educators and private industry on creating brain-friendly environments. She has been an advisor and trainer to public and independent schools across the US and Canada and a host of international schools including schools in South Africa, Botswana and Namibia. In addition, her work has been used by the Boeing Corporation, Family Circle Magazine, USA Today, Canadian Living, the Washington Post, and ABC television.
