

Waterfall Preparatory School welcomes

Dr Melodie de Jager Founder of the Mind Moves® Institute

DYSLEXIA OR NOT DYSLEXIA, THAT IS THE QUESTION

Dyslexia, dyscalculia, dyspraxia. We hear these terms more and more frequently. We are becoming comfortable with accepting these labels and assigning them to children who experience barriers to learning. The truth is, as teachers and parents, these labels provide us with guidance on how to proceed.

What if this is not actually the problem at all?
What if there is another underlying problem, which could be effectively addressed?
What if we could shake off that label and change that child's life for the better?

Come and hear Dr. Melodie De Jager share on how uninhibited reflexes can stand in the way of children reaching their full learning potential. She will also explain how these hiccups in our children's neurological system can be addressed and remedied through Mind Moves.

Melodie's education has been broad and diverse, ranging from a B.Prim.Ed (RAU) in 1982, a B.Ed Psych (RAU) 1985, M.Ed Psych (RAU) 1993 on Maths and Science Learning Readiness to D.Phil (RAU) 2005. Despite all her formal studies, Melodie is quick to point out that most of her experience stems from learning at home from her three children, as well as all the clients she worked with in her private practice.

Date: Tuesday 20 August 2019
Time: 18:00 - 19:00
Venue: Waterfall Preparatory School Hall
Cost: Free
