

Online Technology Survey : Parents

Dear EduExcellence Parents

EduExcellence's plans to move into online education kicked off in the week leading up to the current lockdown. Principals, staff and administrators have been hard at work to ensure that we can deliver an effective educational service to our learners.

However, there are a few key points that need to be considered:

1. This is not a 'one size fits all solution'. We, as educators, and you as parents will need to differentiate the online service depending on the age and needs of our children.
2. By definition an online service makes use of technology and to best service our learners we will need to get a clearer understanding of the technology available to staff and parents.
3. Finally, we understand that the burden of physical presence will rest on you as the parent. As EduExcellence we want to do as much as we can to accommodate you as we now co-opt you as a co-teacher and co-therapist.

To help us prepare for this brave new world we have prepared a short survey.

Please complete honestly while understanding we will do our best to find a workable solution.
