

Skills that can be worked on (Younger Groups)

Addendum A

- ✍ Match, identify and name triangle, circle, square and rectangle.
- ✍ Match, identify and name red, blue, yellow, green, purple and orange.
- ✍ Counting: touch count to 10 and rote count to 10.
- ✍ Cutting: practice cutting strips of cardboard or paper. It is important that the child is holding the scissors correctly (the thumb must be facing up). You can draw a face on the nail to help the children with this. Encourage cutting with a fluid motion not snipping or hacking.
- ✍ Drawing a body image - we are working towards drawing a three part person (head, body and limbs) with features. Talk about the shapes that can be used to draw these parts of the body.
- ✍ Puzzles: 6 pieces (encourage your child to sit and complete the puzzle before moving away)
- ✍ Eating snack at a table, using please and thank you, clearing the table and taking dirty dishes to the kitchen.
- ✍ Working with tongs, tweezers and pegs to develop finger strength.
